HYPERBARIC TREATMENT

HYPERBARIC TREATMENT

\$250 per hour

Hyperbaric is an oxygen therapy that enhances the body's natural healing process by delivering oxygen under pressure, increasing oxygen content in the blood and cerebral spinal fluid, flooding the tissues with oxygen. Hyperbaric oxygen treatments treat the underlying causes and perpetuates of a wide variety of conditions. It is used therapeutically to treat conditions in which tissues have been damaged by oxygen deprivation. When oxygen is restored to these tissues, much of the lost function returns. The treatment also helps to reduce inflammation and promote wound healing throughout the body.

Recommended session of 2 hours per treatment.

Experience why Biologique Recherche has a cult-like following and fall in love with your skin!

LE SOIN LISSANT

DOUBLE LIFT FACIAL

SECOND SKIN TREATMENT

This intense, regenerating treatment is a new anti-aging alternative to facial fillers. Sterile electrospun hyaluronic acid patches are custom fitted to target areas and massaged in with serum until absorbed. The treatment results in plumper and more hydrated skin.

BIOPUNCTURE

\$435

This intensive treatment activates collagen production through intra-epidermal micro-stimulation (sterile 0.25mm needles) and helps fight against signs of aging. A cocktail of amino acids, vitamins, and serums is applied to the skin to improve the treatment's lasting effects. The end result: skin is refined, fine lines and wrinkles are smoothed, and imperfections are minimized.
